-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Objections

1. Claim 3 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

The recited steps of claim 3 are clearly equivalent to the mathematical calculation of the equation stated in parent claim

2.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 & 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Okuno et al.

Okuno et al discloses (column 9, lines 1-35) a printer in which pixel input values are converted into pixel output values and a screen of color value pixels is placed on a print medium in accordance with the pixel output values and at least one

control signal (a halftone curve selected by the operator).

Polynomial coefficients are selected and retrieved from a look-up table for each pixel based on its density level and its color (column 27-29).

Allowable Subject Matter

4. Claims 2-5 & 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter:

Re claims 2 & 7-8 (and dependent claim 3-5 & 9), the art of record does not teach or suggest the described third-degree polynomial in conjunction with selected retrieval of polynomial coefficients for each pixel.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Deschuytere et al discloses a further example of tone level processing using a coefficient function.
